

# Indo-German Strategy on Reigniting Economic Growth

The forum is dedicated to fostering bilateral trade, investment, economic and education relations between India and Germany. The objective of this forum is to build innovative relationship by exploring the dynamics of changing Indian and German markets through discussion and exchange of ideas among the participants and provide platform to network with the Business community and promote trade and investment.

We endeavour to put trade and investment practices into perspectives and highlight concerns faced by forward looking business leaders in India and Germany and their findings to help policy makers in taking informed decisions to address the economic growth aspects of Indo-German relations. Our mission is to synergize business collaborations among small and medium-sized enterprises and global players in India and Germany and we are set to enable SME partners to establish their bilateral projects, explore new ventures and promote their business.
